

Silent Precious Voices

*This Coffee Table Book Can Be Left
On Display To Enlighten People About
Very Important Ecological &
Humanitarian Animal Rights Issues.*

This book comprises of an eclectic different vista for each page.

*As you read through you will find many interspersed pages contain
information linked & connected to each other that will collectively enlighten
you from a diverse range of sources, from various perspectives & from a very
wide spectrum of articles that encompasses the main subject & topic of*

'Antivivisection'

*The general public are basically completely kept in the dark about the wide scale practice
of 'Vivisection', they have no idea what is going on, & how they may be helping to perpetuate
& continue it's atrocious perpetration. This book has an overall view of readable, acceptable,
measured & carefully selected articles to inform about serious animal rights issues.*

*Indisputable facts, conclusive evidence, irrefutable testimonials of authentic undeniable truths,
quotes & excerpts from renowned people, societies, & organisations of genuine integrity & ethical
standards. Reading through will build a picture about an industry basically kept secret by laws
that you are probably totally unaware about, it's a massive billion-dollar industry involving
billions of animals. The Vivisection industry all covertly hidden by denial, deceptiveness,
misleading lies & jargons, illogical, unscientific, ungodly, controlled by a virtual cartel
of mercenary vested*

*interests. Vivisection is unspeakable cruelty, & is a
massive on-going holocaust of horrendous horror &
torture of well in excess of 250 million precious
indefensible animals per year, experimented on for money.*

*Vivisection defies any code of morality,
or ethical scientific, or humanitarian understanding.*

*Please read this book unfolding right through until the end
& then you will comprehend, understand & become aware
of the reasons for the principle motivation & driving
force of decent, humanitarian ordinary & professionally
qualified compassionate people from all walks of life,
joining in the ranks to stop this heinous cruelty & speaking
out against the barbaric, frightful, torture of animals, by
supporting, sponsoring, protesting, & advocating for the*

Total Abolition of Vivisection

"Unseen they Suffer, Unheard they Cry, In Agony they Linger, In Loneliness they Die".

Anon.

*"The fate of animals is of greater importance to me than the fear of appearing ridiculous,
It is indissolubly connected with the fate of men"*

Emile Zola.

Preface

This is a One Hundred Percent totally donated book by the author, & monies gained from donations will be used to refinance the printings of more copies as one of the primary objectives is to freely give away books into schools & libraries & into areas where this information does not normally get to. The book is to publicize & make aware, enlightening school students in particular of the massive cover-up & dark secrets of the pitiless, merciless, inhumane plight of laboratory animals who are needlessly vivisected for inhumane invalid experiments of evil. Donations will also be given to the most prominent Anti - Vivisection & Animal Rights Societies & Organizations rescuing animals that are listed in this book, (see page 32). Helping these societies who assist in the crisis of animals in desperate need & in their pursuit of bringing to light & publishing the terribly cruel circumstances of the more inhumanely abused animals, investigating & exposing & putting on notice universities & cancer funded research facilities found committing barbaric torture & cruelty to animals. Donations are needed by organizations who expose countries causing deforestation displacement of animal's habitats & killing endangered species for human avarice, & greedy multinational profits. This book would never be readable if images were shown or full details included of the treatment meted out to precious & loving animals in such places as; some Korean & Asian restaurants, Asian Bear farms for 'Bear Bile' or the cruelty inflicted upon the helpless Orang-utan's being decimated.

The fur trade with the skinning of many animals but particularly dogs for leather products made in China. At varied western laboratories for pharmaceutical & chemical manufactures, for eastern medicine, medieval pseudo-science of unnecessary external laboratory animal cancer research, & of the outrageous cruelty at some universities. It is mostly unprintable, unspeakable, & far too disturbing & upsetting to read, & it is by these very facts the reason why it is perpetrated & continues with a cloak of anonymity, secrecy, & hidden from becoming known to people. Silence is the licence for unconscionable humans to commit unspeakable crimes of unaccountable heinous cruelty to precious animals in the pursuit of titles, honours of invalidity, money, grants, degrees, & perpetuating employment.

Precious beautiful animals who have; *No Rights, No Voice, No Power, & No Hope*

So allowing it to continue, when the use of animals in any research is obsolete, needless, invalid, & unwarranted. Exposing the existence & reportedly fraudulent reasons for the perpetration of these heinous crimes being conducted may bring about change; you can help by your participation by even using this book & spreading this information.

The pain & gross inhumane torture inflicted on animals is felt no differently to that if inflicted on humans,

'The pain is just the same'.

The terminology & appellation used by me to convey to you the reader of this book the seriousness of humans sharing a part & being responsible for the continuance of vivisection, (animal torture);

I apply to the inhumanity shown to animals by the human race, as a whole.

My personal opinions in this book use these expressions therefore of references to "You" also meaning "Us" which also means "We"

Is anybody exempt for the horror inflicted on helpless animals or are we all complicit as the human race & share blame for allowing it to happen, until it is stopped ?

By "My" actions & "Our" actions as Humanitarians Who Hate Cruelty to Animals as Unconscionable

Governments & politicians sanction & allow the outdated & needless live animal laboratory experiments, for testing, & pseudo cancer research, when there are quicker, cheaper, more accurate alternatives in modern medicines advanced technology.

Societies vote them into power, we need to change this situation, inform & educate.

This book has many pages to reproduce & send to governments, politicians, & everyone.

Extracts from inside this book

"The spiritual malady that rages in the soul of the vivisector is in itself sufficient to render him incapable of acquiring the highest & best knowledge. He finds it easier to propagate & multiply diseases than to discover the secret of health. Seeking for the germs of life, he invents only new methods of death"

Dr. Anna Kingsford. Britain's first woman doctor.

"It is the outrageous lie of the supporter's of vivisection, a lie serious in its consequences, that animal experiments take place for the good of mankind. The opposite is the case; animal experiments only have an alibi function for the purpose of obtaining money, power, & titles.

*Not one single animal experiment
has ever succeeded in prolonging,
or improving,
let alone saving,
the life of one single person. "*

Dr. Med. Heide Evers

"Everyone should know that most Cancer Research is Largely a Fraud, & that the major cancer research organizations are Derelict in their duties to the people who support them".

Dr Linus Pauling PhD, Two times Noble Prize Winner.

"My own conviction is that the study of human physiology by way of experimenting on animals is the most Grotesque & Fantastic Error ever committed in the whole range of human intellectual activity".

Dr G F Walker.

"The claim that we owe most, if not all our advances in medicine to animal research is not only untrue, but preposterous & absurd - an outright lie"

Dr Fadali. From his book- Animal Experimentation- A Harvest Of Shame

It is worthy of note that Professor S.T. Aygun, a virologist at the University of Ankara, who uses only the so-called 'alternative' non-animal research methods,

discovered the danger of Thalidomide to humans and Turkey was spared the tragedy.

During the lengthy trial of the manufacturers in 1970, numerous court witnesses, all animal experimenters, stated under oath that the results of animal experiments are never valid for human beings.

Robert Ryan BSc, C.A.F.M.R.

Silent Precious Voices

*Meism! Voraciousness! The essence of mans choices,
Unaware! Oblivious! Of profound silent voices.
Wealth, materialism, progress, & selfish desire,
Justify, grab, avaricious, greediness to acquire.*

*Silent voices unheard! That have been warning,
Mankind soon to be afraid & he will be mourning.
The Earth began in paradisaical animal splendour,
Now merciless destruction, destroyed, cast asunder.*

*Silent voices of all animals are loudly screaming,
Against the disasters of mankind's innate scheming.
They suffer, & they perish, their habitats denied,
Nobody 's listening to the precious animal's cries.*

*Animals welfare & protection was paramount,
Mankind's selfishness has not taken any account.
If only mankind observed all the animals ways,
But without care & kindness are his relentless days.*

*The ways of a turtle, fish, tiger, bear, insect, or a bird,
Mean survival for man! Do you think that absurd?
Animals habits to preserve is the reason & the key,
Nature being kept pristine means life for you & me.*

*The animals show how this Earth should be conserved,
For man's continual existence man should always observe.
The jungles, savannah, rain forests, oceans, & polar caps,
Are vital to man but he's causing them all to collapse.*

*If only man nurtured all wild animals with protection,
Their habitats are taken away, with oblivious rejection.
For the ruination of this earth is mankind's demise,
Habitats gone! So with green house gases man dies.*

*Believe in God? Or evolution? Nature still bleeds,
Mankind negates kindness, & all the animals needs.
And his conscience should be guilty for gross brutality,
To animals he denies mercy, with a mentality of barbarity.*

By Peter J Hayllar.

Vivisection Is Invalid Fraudulent Corrupt Unscrupulous Merciless Animal Cruelty Unethical Wicked Inhumane Bogus Deceptive Misleading Causing Death To Humans

Poisonous substances, chemicals, drugs, or toiletry cosmetics, can be properly scientifically tested without testing on animals, & there are certainly No laws requesting the use of animals in any form for invalid laboratory experimental pseudo cancer research or for any other reasons.

Vivisection cruelty of invalidity is carried out purely for commercial purposes; it's a moneymaking business. Quote- "Dangerous substances would not be marketed if the smokescreen of animal research data were ruled unacceptable as evidence" Dr Peter Mansfield. Founder – President, Doctors in Britain Against Animal Experiments. If a person sues a drug company for damages the defence is always that they underwent the required tests. They were not required by law to use this method, but properly approved available scientific testing generally finds the substances too poisonous & banned. Laws allow the use of animals in laboratory research against the collective advice of ethical, eminent, renowned, doctors, & scientist's world wide, & of the greater number of the general publics demands, when the full horror, invalidity, & evidence of its culpable failures, causing the deaths of hundreds of thousands of people worldwide is explained to them. Quote- "Acute toxicity from prescription medicines(Adverse Drug Reactions) stands now as the fourth leading cause of death in the EU, claiming 120,000 lives each year, a figure which could probably be doubled or even tripled if we include the longer term, or chronic, toxic effect of drugs" Doctors & Lawyers for Responsible Medicine. There are new developments in scientific analysis, Quote- " Truly scientific methods of biological & medical research already exist: epidemiology, computers for the construction of mathematical models, cell & tissue cultures in vitro & many others" Prof. Pietro Croce MD From Vivisection or Science? The animal laboratory experimental industry is a massive (Covertly Secret) billion-dollar industry & has a recorded history of one of the greatest crimes of animal cruelty & torture over decades of failures to produce what if any benefits to mankind? Of all the crimes of heinous abject cruelty & barbarity ever committed in history by the human race, future generations will record vivisection as worse than slavery. Systematic torture of defenceless animals in their billions to maintain employment for every one connected to it in some way, for avarice, degrees, & kudos, & paid for by the duped people of the day in donations to some cancer organizations concealing the worthlessness of the vivisection cruelty they perpetuate.

Quote- "Without animal experimentation the vivisector would lose the opportunity of reaping with no talent & little effort, academic titles & honours & of publishing papers, making money & pursuing a glittering career. They would also have to waive the chance of currying favour with the powers-that-be by supporting one thesis one day & the opposite thesis the next day with the same persuasiveness. All this on the strength of allegedly 'irrefutable' results of animal experiments & according to whatever result has been requested by whoever foots the bill. Animal experiments have proved dangerously misleading for mistakes, assessing human health. Animal experiments continue to lead, to terrible resulting in disease & death for the human population, regardless of the ins & outs of the law. Vivisection is nothing less than scientific fraud".

Nurses Movement for Responsible Medicine.

Please do not donate to "Cancer Funds" Until you have checked to find out if they give grants to universities or fund animal research of horrific cruelty. Some well known cancer funds with impressive titles are funding this heinous cruelty of invalidity, wasting your money & vital resources, & perpetuating this heinous holocaust for animals.

Logical Vivisection Contradiction

*If you ask the experimenters why they experiment
on animals, the answer is;*

"Because the animals are like us"

*Ask the experimenters why it is morally okay
to experiment on animals,*

& the answer is:

"Because the animals are not like us"

Animal experimentation rests on a logical contradiction.

Professor Charles R Magel

Abject Cruelty of the Live Export Trade

Every year millions of Australian animals are exported live for slaughter.

Those who survive the journey often endure brutal treatment & conscious slaughter.

*Barbaric, sickening, frightening, & disturbing televised death of 2000 sheep on transport ship 8th April 2018
Horrendous cruelty on mass scale of absolute callousness but unconscionable interests try to defend the inhumanity.*

The following slightly abbreviated excerpt taken from information from the Animals Australia web site.

Animals Australia have done extensive investigations into the live export trade uncovering some of the worst animal cruelty perpetrated resulting in prosecutions & at one stage a temporary ban being imposed on the sickening trade. Cattle, sheep & goats are sent throughout the Middle East & South East Asia. To countries with no laws to protect them from cruelty. Tens of thousands of animals don't survive the sea journey & those that do disembark into countries where they are transported, handled & then slaughtered in appalling ways. Most animals slaughtered overseas have their throats cut while they are fully conscious, leading to an incredibly painful & prolonged death.

Despite the fact that governments new regulations have now been implemented in every export market (except Egypt), shocking cruelty continues to be exposed, including in Turkey, Indonesia, Kuwait, Qatar, Pakistan, Israel, Mauritius, & Egypt, in every export market that Animals Australia has investigated, they have uncovered cruelty.

The journey over the past 30 years of Australia's live export industry has exported over 200 million animals to the Middle East during that time over 2.5 million animals have died en route & many more have suffered injury, illness, & distress directly caused by transportation by sea. The major cause of death on ships for sheep is 'inanition' failing to eat, caused by the stresses of transportation & the unfamiliar pellet food provided. The history of the live export trade is littered with disasters caused by storms, heat episodes, mechanical failures, fires on board, & trade disputes. In 2009, 32,117 sheep died en-route & in the Middle East Animals Australia has conducted seven investigations since 2003 which have revealed appalling cruelty to Australian & other animals in the region.

There are no laws to protect animals from acts of cruelty in the Middle East. Animals have their throats cut whilst fully conscious, a barbaric & cruel method of slaughter which is illegal & unacceptable in Australia. Australian sheep are routinely purchased by individual buyers & merchants, tied up with rope & shoved into car boots in a region where temperatures regularly hover near 50 degrees C in summer. Local people throughout the Middle East believe Australians approve of their treatment of animals. They have reached this logical conclusion based on our willingness to provide them with animals for slaughter for over 30 years. Rather than inspiring desperately needed change in attitudes & treatment- the continued supply of Australian animals is reinforcing long held beliefs that their treatment of animals is acceptable. The operation of Australia's live export industry, & the tens of thousands of animals that die en route to the Middle East each year sets an example that profit is more important than animal welfare & that animals are simply chattels to be traded & slaughtered.

Despite Australia's live export industry having representatives in the region for two decades, cruel & brutal treatment of animals remains routine & widespread throughout the region. The alternative is to ban live export & set an example & precedent that will inspire change. Such a decision by the Australian government would protect millions of Australian animals from cruel treatment, & ensure that animal welfare was brought to political & public prominence in the Middle East. Australia's chilled halal meat trade is already almost equal in value to Australia's live sheep trade to the region & growing significantly each year. Regardless- some things are just wrong & no amount of profit will ever make them right. End of Animals Australia edited excerpt.

Animals Australia at the Forefront of Helping to Stop Animal Abuse in Many Areas Obtaining Results by Dedicated People. Their work in banning the live export trade needs Your Support & Valued Donation.

*Exporter Supply Chain Assurance System (ESCAS) Another load of incompetent government rubber stamping? The following edited from: Voiceless the Animal Protection Institute. www.Voiceless.org.au Quote "Gross cruelty continues not detected by ESCA but uncovered by charitable funded group **Animals Australia**. Clearly the government's own regulation is failing to prevent or detect cruelties in the live export trade. A 2012 survey found that 78% of Australian's believed live exports were cruel & should be banned. "The paramount consideration must now be an ethical one. The live export trade as currently carried out is indefensible. It must stop" Argues Voiceless patron the Honourable Michael Kirby AC CMG". Unquote. Nothing but cruel mindless merciless decisions from the cruel Australian government against the public majority, for profits & for those with their snouts in the trough.*

The end results of cruelty to animals you allow !

*There's a pot-pourri of poisons & it's now the soup of the sea,
The clear pristine blue waters contaminated by you & me.
As the multinational products all finally leach out in the rivers,
Off the land into the sea diluted, nature dies as nature quivers.*

*The sea is now the dumping grounds of human toxic waste,
Poor whales have to suffer for they have no other place.
Evidentially toxins in whales are at an alarming degree,
Think carefully the cause is known, Yes! It's You & Me.*

*The poisons in the air, in your cupboards on your shelves,
Cleaners, aerosol sprays, & cosmetics all used by ourselves.
The fruit & vegetables in poisons all are coated & covered,
Destroyer of insects, plant disease, & whales too it's now discovered.*

*Indiscriminately murdering whales, destroying their food chain,
Whales habitats of oceans poisoned for your selfish ignorant gain.
Every poison produced & sanctioned you allowed onto the market,
The sea, air, land, birds, humans, fish, are multinational targets,*

*Because you allow, turn a blind eye to animal experimentations,
Fraudulent testing performed on animals of gross abominations.
For sanction, approved, poisons onto the market animals are tortured,
This you allow, the devastating crime of cruel inhumanities cultured.*

*If animals were all protected, if the cruelty was stopped immediately,
All the petro-synthetics poisons would be properly safety tested specially.
Multinationals made to abide by scientific analysis of all their products,
Will end poisoning & all animal torture you allow them to conduct.*

*The governments you vote for, sanction animal testing & cruelty,
Unless you speak out! Condemn, then you, with them agree?
The price of fraudulent animal torturing to approve poisons by a lie,
The end results of animal cruelty means all life & we shall die.*

By P J Hayllar.

This Book Contains Hundreds of Quotes Verifying the
Absolute Unnecessary Use of Animal Vivisection.
(Animals used for Testings & Experimentations)
Millions of people die every year as a direct cause of animal tested
Mendicants & substances being released onto the market

That under proper analysis would be banned.

The following quote taken from page 22,

“Our method is not confidential, & we need as much publicity as we can get, since there is a very strong commercial, political & scientific lobby to continue animal experimentation.

This is a very big business world-wide, & although most scientists who have examined our computer graphic approach to the safety evaluation of chemicals agree that it is more scientific than current animal experimentation procedures, they are unable to use this because of outdated government regulatory requirements & certain vested interests of industry.”
Communication from Dr D, V, Parke, Dept., of Biochemistry, University of Surrey, 21st June 1990.

The following quotes taken from page 55

“All our knowledge about structure, symptoms, diagnosis & treatment of cancer in man comes from those who have tackled the problem with clinical methods. This knowledge owes nothing to animal experiments”. **Prof Hastings Gilford. In the Lancet.**

“The idea that vivisection helps humanity is pure myth & utterly unscientific” **Dr Gwen Mellor**

The following quote taken from page 70

“The failure is deliberate. Before they started trading as “Cancer Research UK”, the Imperial Cancer Research Fund & the Cancer Campaign had around 170 years of fund raising between them.

When they started cancer was a rare disease.

Now it is out-of-control: 40%- & rising- of the UK population have, or will develop cancer. A rate expected to rise by 50% by 2020. Cancer Research UK are collecting over 400,000,000. Pounds sterling-increasing per year. None of which will be spent on research into safe, effective treatments. Cancer Research UK will not fund any research which is a threat to the ‘Cancer Business’”

The British Anti-Vivisection Association.

The following quote taken from page 61

“Animals don’t have anyone to protect them.
If we don’t stand up, the people who are harming animals
Will never get stopped” **Paul Rodriguez**

Vegetarian Integrity & Healthiness

"Thy shalt not kill" does not apply to the murder of one's own kind only, but to all living beings; & this commandment was inscribed in the human breast long before it was proclaimed from Sinai, Vegetarianism serves as the criterion by which we know the pursuit of moral perfection on the part of humanity is genuine & sincere. [Leo Tolstoy, 1828-1910.](#)

The Utopians feel that slaughtering our fellow creatures gradually destroys the sense of compassion, which is the finest sentiment of which our human nature is capable. [Thomas More - - 1478-1535.](#)

Nothing will benefit human health & increase chances for survival of life on earth as much as evolution to a vegetarian diet. [Albert Einstein - - 1879-1955.](#)

It is strange to hear people talk of humanitarianism, who are members of societies for the prevention of cruelty to children & animals, & who claim to be God-loving men & women, but whom, nevertheless, encourage by their patronage the killing of animals merely to gratify the cravings of their voracious appetites. [Ottoman Zar-Adusht Ha'nish 1844-1936.](#)

If slaughterhouses had glass walls, everyone would be vegetarian. We feel better about ourselves & better about animals, knowing we're not contributing to their pain. [Paul & Linda McCartney.](#)

Consumption of red meat produces the nutrient L - carnitine- increasing blood levels of trimethylamine-N-oxide (TMAO) which slows the removal of cholesterol (plaque) that accumulates on arteries walls, (heart disease). TMAO could be affecting the human body's immune system depleting its effectiveness to fight other disorders possibly such as colon cancer, which is virtually not a problem in vegetarians but is a serious problem with many red meat eaters. The immune system, kidneys & liver, are overworked processing red meat, also affecting your gut bacteria promoting the growth of L - carnitine.

"Awareness is bad for the meat business. Conscience is bad for the meat business. Sensitivity to life is bad for the meat business. Denial, however, the meat business finds indispensable" [John Robbins, Diet for a new America.](#)

It is believed by meat producers that humans require meat to build strong bones & bodies ! But almost all the strong animals are vegetarians !

Intensive farming uses millions of tons of grain that could feed many more billions of starving people than fed to animals to produce little in return.

Grain is better & does not produce green house gases, it is better by diversity in storage, handling, distribution, production, & nutrition. Intensive farming would cease if mankind could behave intelligently & humanely on this issue. [Peter & Susan](#)

"Too much protein (meat?) Causes excessive toxic ketones harmful to kidneys, also heart palpitations, headaches, dizziness, bad breathe, apart from arterial damage, & weight gain. An excessive protein intake can be harmful to your liver, brain & nervous system. Excessive protein over a long period of time can cause your liver to become overworked, allowing ammonia & other toxic substances to build up in your bloodstream, resulting in arthritic disease's, & leads to hepatic encephalopathy, a condition marked by decline in brain & nervous system function" by: [Maria Appleby, NASM -CPT, Demand Media.](#)

"Tel Aviv University. Excess protein linked to Alzheimer's must be prevented before it accumulates on the brain" by:

[Judy Siegel-Itzkovich, Jerusalem Post 23-11-2009.](#) "You could also develop more serious problems, as excessive protein leads to a build-up of amino acids, insulin or ammonia in your blood stream" by: [International Journal of Sport Nutrition Exercise Metabolism in 2006.](#) According to [Dr. Douglas Graham.](#) "Too much protein in our diets is associated with all manner of health impairments, including such symptoms as constipation and other digestive disorders that often lead to toxemia (toxic blood and tissues) and eventually, cancer. Autoimmune dysfunction, arthritis, and all other autoimmune conditions, premature aging, impaired liver function, kidney failure, osteoporosis, and many other pathogenic conditions result from eating more protein than we need." [According to Dr. Gabriel Cousens in his book Conscious Eating](#)

"An excess protein diet has also been found to cause a deficiency of B6 and B3. Protein has also been found to leach out calcium, iron, zinc, and magnesium from the system." The late nutrition expert, [Paavo Airola, Ph.D.,](#) stated that overeating protein "contributes to the development of many of our most common and serious diseases, such as arthritis, kidney damage, pyorrhea, schizophrenia, osteoporosis, atherosclerosis, heart disease, and cancer: and that a "high protein diet causes premature aging and lowers life expectancy." [Peter & Susan Hayllar](#) observe: The common myth that our ancestors were big meat eaters up to recent centuries ago is wrong, it was a luxury not affordable by many; the wealthy still consumed lots of fibre, root vegetables, fruits, & grains, red meat was definitely not eaten with every meal as many people do today, vegetables were eaten with oysters, fish, & pigeons. The huge consumption of red meat is as never before in history, with billions of farmed animals producing massive amounts of green house gases. Vegetarians are healthy not overweight & enjoy a sensible nutritional diet. They do not struggle with the hypocrisy of many meat eaters proclaiming to love animals but many violate their consciences with the responsibility for causing the heinous horror & terror of slaughterhouses full of pain, cruelty & suffering that they are frightened to witness or discuss. Guilty consciences? Moral integrity defiled? Medical advice & new discoveries of harm to their health from eating meat (cows, calves, sheep, lambs, pigs) being ignorantly or wilfully ignored? Animals suffer pain & violent deaths, endure cruelty & horribly treated lives for unconscionable people's voracious appetites.

The Greed Disease

In my opinion there exists a conspiracy of the medical-pharmaceutical interests on an international basis to eradicate alternative health (not disease) care from the people of the world with a total disregard for the health & life of the people. I feel that the major motivation of this potentially destructive scheme is the desire to make money & I call the condition of this utter sickness of man – ‘The Greed Disease’ I observe the conspiracy is interwoven with the American Medical Association, the Federal Government, especially the Federal Drug Administration, the Federal Trade Commission, the Pharmaceutical Advertising Council, & the entire media including television networks, radio networks, newspapers, magazines, & book publishers. The media domination prevents the majority of people from being conscious of these negative forces & focuses their minds on the propaganda that alternative health-care is ‘quackery’. However the Office of Technological Assessment reported to the Congress in the late 1970’s that only 10% of the methods utilized in allopathic (official, orthodox) medicine are proven safe & efficacious. Quackery is defined as using unproven methods for profit. So who are the real quacks, anyway?

Much of the enlightenment of the extremely cruel vivisection portion of this cartel is revealed by the writings of Swiss medical historian Hans Ruesch in the books ‘Slaughter of the Innocent’ & ‘Naked Empress’, which have both suffered international suppression (by the corporate mass-media & the medical powers).

Vivisection is a paramount symptom of the Greed Disease & of the inhumane, unscientific, ignorant individuals who perpetrate it throughout the world.

Animals are not human beings & do not react in a similar fashion to a drug.

What might be beneficial in an animal might be lethal to a human, (tens of thousands of human deaths are testimony to this fact) & conversely. Where is the logic to transfer information from animal experimentation to human usage of toxic chemicals? It is in the pocket-books of the members of the conspiracy- the ‘Greed Disease’.

Ray Kupsinel, MD: medical magazine editor in Oviedo, FL 32765.

‘Species Capable of Moral Choice’

To us it seems incredible that the Greek philosophers should of scanned so deeply into right & wrong & yet never noticed the immorality of slavery. Perhaps 3,000 years from now it will seem incredible that we do not notice the immorality of our own oppression of animals- - ‘Sentimentalists’ is the abuse with which people counter the accusation that they are cruel, thereby implying that to be sentimental is worse than to be cruel, which it isn’t - - I don’t hold animals superior or equal to humans, the whole case for behaving decently to animals rests on the fact that we are the superior species. We are the species uniquely capable of imagination, rationality, & moral choice – & that is precisely why we are under an obligation to recognise & respect the rights of animals. Brigit Brophy.

We have enslaved the rest of the animal creation, & have treated our distant cousins in fur & feathers so badly that beyond doubt, if they were able to formulate a religion, they would depict the devil in human form.

William Ralph Inge. ‘Outspoken Essays’

Yesterday - Today - Tomorrow

*Yesterday, a day in your life, did you flitter it away?
86,400 seconds to question, to reflect, & to weigh:
Was it wasted? Was it squandered? Was it misspent?
In summation just what did your existence represent?*

*As an entity of life on earth filling space & time,
Using a God given life with free choice sublime:
Did you achieve or add anything fulfilling of value?
Was there a minuscule moment worthwhile to pursue?*

*Unenlivened your days may pass routinely, uninspiring,
Feeling there's something else unknown you're desiring:
Today! Today! Realize, resolve, enact & work it out,
Understand, examine, and change, what your life's all about.*

*Today may slip by so quickly you will eventually find,
So short is your life, but if you search deep in your mind:
Your conformity to the norms means life's passing you by,
Take a step, step & listen to an important animal's cry.*

*Today can be the very first day your life really counts,
Achieving good with integrity worthwhile to surmount.
Not wasting another day, but new ideas in your head,
Accomplishing beneficial works of great value instead.*

*Let an exciting door open up & learning new insight,
Start helping the ecology & intercede in animal plights.
Learn about institutions conducting horror for wealth,
And what's hidden from you by a sick world of stealth.*

*You can actually become important as you explore,
Helping animals in need unknown to you about before.
Tomorrow you can do so much good as you comprehend,
That your action can be instrumental helping horror end.*

*Join the ranks of professional people speaking up to say,
All experiments against animals are horrific & not okay.
Put your life to humane works a noble, honourable, task,
Endeavour to help animal's, who plead, who cry, who ask.*

By Peter J Hayllar.

DOCTORS AGAINST VIVISECTION

For over 100 years thousands of medical doctors & scientists have opposed animal experiments in relation to human medicine

- ✱ “Vivisection is rooted in error, & when the truth becomes known it will disappear” Dr Max Mader, GP
 - ✱ “It is impossible to mimic a chronic human disease in animals. The reason is that each species is Biochemically Immunologically, Physiologically, & Anatomically Unique” Brandon Reines, DVM & revisionist medical historian “Psychology Experiments on Animals 1982”
 - ✱ Younger physicians, as described in a letter appearing in the prestigious British medical journal ‘The Lancet’ “Must say nothing at least in public, about the abuse of laboratory animals for fear of jeopardising their career prospects” - The pressure on young doctors to publish & the availability of laboratory animals have made professional advancement the main reason for doing animal experiments”
 - ✱ “Most medical research is done by people who are not medically qualified- - A survey published identified 10,805 medical researchers, of whom almost three quarters were not medically qualified” BMJ
 - ✱ “Atrocious medical experiments are being done on children, mostly physically & handicapped ones, & on aborted fetuses, given or sold to laboratories for experimental purposes. This is a logical development of the practice of vivisection. It is our urgent task to accelerate its inevitable downfall” Prof. Pietro Croce, MD, International researcher, former vivisector.
 - ✱ “Our method is not confidential, & we need as much publicity as we can get, since there is a very strong commercial, political & scientific lobby to continue animal experimentation. This is a very big business world wide, & although most scientists who have examined our computer graphic approach to the safety evaluation of chemicals agree that it is more scientific than current animal experimentation procedures, they are unable to use this because of outdated government regulatory requirements & certain vested interests of industry.”
Communication from Dr D,V, Parke, Dept, of Biochemistry, University of Surrey, 21st June 1990.
 - ✱ “The problem is- - you will never know how the human being will react until you have the human test result. It doesn’t matter whether the dog dies or the cat thrives on it, you have to have the final solution where humans are subjected to the chemicals to whether they work or not” Guardian, 29th Aug 1998.
 - ✱ “And we must be aware that a lot of what the research community is doing is not wanted”
Professor, Alan Maynard, Hospital Doctor.
 - ✱ “Since there is no way to defend the use of animal model systems in plain English or with scientific facts, they resort to double-talk in technical jargon- - The virtue of animal model systems to those in hot pursuit of the federal dollars is that they can be used to prove anything- no matter how foolish or false, or dangerous this might be. There is a wide variation in the results of animal model systems that there is always some system which will prove a point- - The moral is that animal model systems not only kill animals, they also kill humans. There is no good factual evidence to show that the use of animals in cancer research has led to the prevention or cure of a single human cancer.” Dr. D.J. Bross, PhD, 1982, former director of the largest cancer research institute in the world, the Sloan-Kettering Institute, then Director of Biostatistics, Roswell Memorial Institute, Buffalo, NY. ✱ “Animal models have virtually no statistical predictive value” S Peller, “Quantitative Research in Human Biology & Medicine”
 - ✱ “Like every member of my profession, I was brought up in the belief that every important fact in physiology had been obtained by vivisection & that many of our most valued means of saving life & diminishing suffering had resulted from experiments on the lower animals. I now know that nothing of the sort is true concerning the art of surgery: & not only do I not believe that vivisection has helped the surgeon one bit, but I now know that it has often led him astray” Prof. Lawson Tait. MD. Fellow of the Royal College of Surgeons (F.R.C.S) Edinburgh & England. Hailed as the most distinguished surgeon of his day, the originator of many of surgery’s modern techniques, & recipient of numerous awards for medical excellence.
 - ✱ “Normally, animal experiments not only fail to contribute to the safety of medications, but they even have the opposite effect” Prof, Dr. Kurt Fickentscher, of the Pharmacological Institute University of Bonn.

Animal Experimentation: Cruel & Unnecessary.

The edited excerpt was extracted by members.iinet.net.au from PETA. webwww.envirolink.or/arrs/peta/ Many animals are used in scientific & medical research. They often undergo cruel methods of testing & suffer greatly as a result. Animal experimentation is both cruel & unnecessary & humans have no right to put innocent animals through such torture. Scientists often don't benefit from testing on animals as they are so different from us & react differently to drugs. Results obtained from experimenting on animals are unreliable, misleading & has caused countless thousands of human deaths, deformities, & permanent damage. Proven over many decades extrapolation of testing on animals to humans is impossible. There are numerous cases that highlight the absurdity of assuming that animals & humans have a biology sufficiently similar for experimentation to yield useful results. For example: morphine calms humans but excites cats, cortisone causes birth defects in mice but not to humans, penicillin kills guinea pigs & hamsters & aspirin kills cats. If the results of tests on animals had been relied upon we would not have penicillin or digitalis (a drug used by heart patients but which was withheld for a long time because it was found to raise the blood pressure in dogs). We would also be without chloroform (once a common anaesthetic but not used initially because it was toxic to dogs) & aspirin (which causes foetal deformities in rats & is toxic to many animals). Certain steroids, adrenaline, insulin, some antibiotics are also toxic to many animals but medically benefit humans; animal testing is nonsense of medieval, pseudos science. For many years the cancer research industry have used rats in their animal experimentations & still do. But reported in the Age Feb 1993, that using rats was virtually proven pointless. The way rats gene repair systems work is vastly & significantly different to humans. Years of wasted research, enormous amounts of money by fund raising donations from the general public, & the only known correct & undisputable results & facts are that many people connected in the animal cancer research organizations have become extremely wealthy at the cost of a huge & immense amount of needless, & pointless, animal suffering.

Animal rights & animal welfare are profoundly different movements & ideas.

Animal welfare seeks to regulate the exploitation of animals. Animal rights seeks to end it.

What exactly is animal rights? The concept of rights of animals is simple. The most basic right of a sentient being, whether they are human or any other animal, is the right not to be someone else's property. Being the property of another means that you are treated as a resource: your only value is that which your owner places on you. When it comes to other animals, being the property of humans means that they can be tortured & killed in the name of profit-whether it is being imprisoned & mutilated on farms, exploited in zoos, circuses & rodeos or poisoned for a batch of shaving cream, new detergent or mascara.

The economic interests of the property owner always outweigh the interests of the property, even when this interest is to avoid suffering, to be free from exploitation or even, simply to live. As long as other animals are considered property both in law & in mainstream opinion they will never be free from exploitation. Just as we oppose the exploitation of humans, Animal Rights Advocates Inc, opposes the exploitation of other animals. Whilst there is suffering & injustice in the world we will never be at peace. On the frontiers of animal abuse- such as genetic engineering- & in more traditional research like vivisection & meat production, animal welfare's task is to minimise unnecessary suffering where possible. The greater good of humanity is always the primary concern, & will always justify 'necessary' Animal rights does not believe in addressing 'symptoms' through monitoring & regulating animal abuse. Animal rights instead addresses the fundamental root of animal suffering, which lies in the supremacist belief that animals, as part of the non-human environment, exist only for human purposes.

This belief results in the trivialisation of the lives of animals because they are viewed merely as expendable, replaceable property of a worth measured only by human standards of money & utility. However, non-human animals, like humans, do not exist for the other's sakes. They exist for their own. In animal welfare, there are glimmers of recognition that animals have interests of their own. But these are unfailingly beaten back by human interests, however trifling.

Animal rights suggests that these interests should be balanced properly. End of excerpt.

PETA- People for the Ethical Treatment of Animals. www.Peta.Org.UK **Contact to join.**

A sentient being is absolutely no different to humans in feeling above all else **Pain.**

Would you like to be filled up with a poison half your body weight, to see what it does to you?

Have caustic substances put in your eyes to determine the destructive already known result?

You do not have to be an Animal Rights Advocate to know that cruelty to animals, lack of mercy, compassion, kindness, & logical humane integrity means that even you should be speaking out & up in opposition to the inhumane abuse & torture of precious laboratory animals. Peter J Hayllar.

The Courage To Declare

Unfortunately these experiments will continue in a self-proliferating manner until they are curtailed by brave & innovative decisions on the part of people in positions of authority who have the courage to declare openly that the emperor has no clothes & that it is time to stop wasting money & animal lives on the pretence that manipulating several variables in rats, dogs, cats or monkeys has anything to do with human psychology.

Murray Cohen, MD.

Benzine caused leukaemia in humans & carcinogenic smoking, but not so in animals. Glass fibres & asbestos caused cancer in humans for many years, animal testing delayed this discovery thousands of lives lost, due to mindless medieval animal experiments.

Animal experiments the excuse an alibi for the culpable manufactures of poisons.

Pace makers & heart valves delayed, high cholesterol, coronary heart disease cures delayed, medications that are harmful & continue to be discovered delayed causing death.

Stroke victims denied beta-blockers causing death, radial keratotomy blinded first human patients, failure to find methoxyflurane poisoned kidneys in humans.

Failure to find muscle relaxants during anaesthesia, failed to find cyclosporine 'A' inhibits organ rejection, failed to find obliterative bronchiolitis due to animal tests.

Animal research caused failure to discover bacteria as main causes of many infections, new medications caused lethal dysrhythmias, kidney failure, seizures, respiratory arrest, liver failure, stroke neurological problems with Zelmid antidepressant, Amrinone caused thrombocytopenia & deaths, Fialuridine caused liver failure, Olicquinol ant-diarrheal caused paralysis & blindness, Eraldine a medication disaster causing deaths.

Severe reactions, pain, suffering, & deaths through, failure of animal tests to name only few of hundreds on, Opren, Zomax, Isoproterenol, Merthylsergide,

Suprofen, Surgram, Selaacryn, Perhexiline, Mitoxantrone, Carbencaxalone, Clindamycin, Linomide, Cylert, Eldepryl, Fenfluramine, Trogliazone, Tacrolimus, Corticosteroids, Thalidomide. Polio vaccine delayed for years, Penicilline would not have been discovered by animal tests. Drugs lethal & harmful to humans but animal experiments showed no reactions as the extrapolation of animal tests to humans is impossible.

Hedgehog Precious Hedgehog

*Rustling & foraging, a little hedgehog hides all day,
Sheltering from mankind who would take his life away.
Wild little animal harmlessly working nature's purpose,
Not wanting a part of mankind's innate senseless circus.*

*Extinction is looming for these hedgerow gardening keepers,
Unless mankind's own demise is first with the grim-reaper.
For precious little animals who's existence lightens up the universe,
Mankind's never ending progress is extinguishing their light on earth.*

*Such diversity & character, almost funny & mischievous,
Struggling against mankind's destructive ways so devious.
Happy, content, without a care to be left alone it is their choice,
Silent precious hedgehog for against annihilation you have no voice.*

*You are a perfect symbol little hedgehog of wild nature at it's best,
You are the evidence of callous man whose protection failed the test.
To safe guard your vulnerability, to shield & shelter for safekeeping,
Silent Precious Voice's should be heard, for you we should be weeping.*

*For some people see you as a creature of unique irreplaceable beauty,
To protect & value hedgehogs beyond measure is mankind's duty.
But the greedy ruinous selfish mankind's ways are full of no remorse,
As they take away all habitats for deleterious clearing is his course.*

*To pick you up & cuddle you & assure everything will be all right,
We know is now impossible against mankind's stupidity & might.
They want your home for concrete jungles & massive car parking,
To bring this earth to ruin destroying nature mankind's
embarking.*

*You signify little hedgehog a point of mankind's absolute
disgrace,*

*In the treatment & the causes a little hedgehog has been
made to face.*

*Splendiferous little hedgehog but your prickles cannot
turn the tide,*

*Of the inhumane imbecility by mankind, roll-up,
try to survive & hide.*

By P J Hayllar.

Why do pharmaceutical drugs injure & kill so many people?

This shortened for space article reproduced from www.MedicineKillsMillions.com

By Robert Ryan BSc, CAFMR

Fraud in Clinical Drug Trials - Human Tests.

Drug companies can easily arrange appropriate clinical trials by paying a researcher to produce the desired results that will assist the intended application of the drug. The incentive for researchers to fabricate data is enormous. As much as \$1000 per subject is paid by American companies which enables some researchers to earn up to \$1 million a year from drug research. And they know all too well that if they don't produce the desired data, the loss of future work is inevitable. Unfortunately, because of secrecy, most fraud in clinical drug trials is unlikely to be detected.

However, **cases of data-fabrication in clinical drug trials have been uncovered** where, for example, "patients who died while on the trial were not reported to the sponsor....Dead people were listed as subjects of testing... People reported as subjects of testing were not in the hospital at the time of tests..." and where "Patient consent forms bore dates indicating they were signed by the subjects after the subjects had died" Even if data from clinical trials is not falsified, it is often of little worth, because they are not performed appropriately. Trials involve relatively small numbers of people and the subjects taking part usually do not represent those who will use the drug after its approval; so many harmful effects of a new drug appear only when it has been marketed.

Fraud in Vivisection - Animal Tests.

In 2004, the *British Medical Journal* published an article titled "Where is the evidence that animal research benefits humans?" It states: "the public often consider it axiomatic that animal research has contributed to the treatment of human disease, **yet little evidence is available to support this view.**" After 150 years of animal research, literally billions of animals used, billions of taxpayer dollars spent, and regular articles in the commercial media that claim animal research benefits humans, this revelation might shock you.

Let's look at why one of the world's leading medical journal states, "yet little evidence is available to support this view"; the view that animal research has contributed to the treatment of human disease.

The problem of inappropriate and flexible testing of drugs and chemicals, that we saw above regards clinical trials, is even more pronounced with the use of so-called animal 'models'; a practice termed vivisection.

For instance, the fact that the animal is relatively healthy before the experiment means that disease and or trauma has to be induced by violent and artificial means. **This bears no relation to the spontaneous ways in which Humans develop illness, often through a faulty lifestyle & diet.**

For example, consider the case of osteoarthritis, a human degenerative disease resulting in grotesque and painful deformities of the joints. How do researchers attempt to mimic human lameness ? In dogs, cats, sheep and pigs? The animal's joints are beaten with hammer blows, injected with irritating liquids, subjected to ionising radiation and/or dislocated. It is obvious that the resulting fractures, haemorrhages, thromboses, contusions and inflammation bear no relation to human osteoarthritis, "which is a local manifestation of a generalised illness of the collagen"

The fact is, if you had a new possible treatment for humans with cancer would it make sense to test it on humans who do *not* have cancer? No, because there are tremendous differences in metabolism which would produce very different results. The people without cancer will react very differently to the treatment than the people with cancer. It is even more absurd to think that test results from healthy members of one species, or from those with artificially induced symptoms, can be applied to another species. Drugs tested on such artificially diseased non-human animals cannot possibly yield results relevant to a spontaneous, naturally occurring human disease. **Moreover, there is no true correlation between different species.**

Drug Companies Make These Admissions

Because they had performed the required animal safety-tests, and because these did not show evidence of any danger, the manufacturers of Thalidomide were found not guilty by the court of consciously marketing a harmful drug. Secondly, as explained above by Dr Herbert Gundersheimer, **animal tests then serve as legal protection for corporations when their products kill & injure people. End of article.**

Following by P J Hayllar. It is very important to note & realise that Professor S.T.Aygun, a virologist at the University of Ankara, who uses only the so-called 'alternative' non-animal research methods, discovered the danger of Thalidomide to humans and Turkey was completely spared the avoidable tragedy. During the lengthy trial of the Thalidomide manufacturers in 1970, numerous court witnesses, all animal experimenters, stated under oath that the results of animal experiments are never valid for human beings.

You Are Not Alone

*Compassion & concern for the animal kingdom
is an attribute of moral strength & character.*

*Rather be labelled a sentimentalist or
abnormal than follow the lemmings of
mankind by accepting exploitation &
cruelty to animals, use your conscience.*

*Taking a stand & speaking out against
animal experimentations is to do so alongside
the many great men & women of integrity
strong principles of goodness & humanitarian ideals.*

*Do not be afraid to condemn the insidiously merciless
barbaric cruel medieval pseudo-scientific animal experiments
for fraudulent mercenary gains, against all laboratory animals.*

You Are Not Alone.

Politicians Enacting The Biosecurity Bill Legislation, Why & Who For?

Designed To Protect Law Breaking Criminals Who Commit Cruel Animal Abuse,
By Charging & Prosecuting Decent People Who Discover & Expose The Crimes.

Politicians & The Public Are Being Hoodwinked By The Lobbyists Of Vested Interests.

Particularly in response to the Australian Live Export Trade, exposed April 2018 for the mass
horrendous cruelty, suffering, & death, being caused to animals & going on unabated.

This is an Australian national disgrace that the general public are hoodwinked into believing legislation like the proposed Biosecurity Bill 2015 is warranted, the truth is, it's a bill to protect people from being found out & exposed for committing immense animal cruelty & horrendous suffering. They want to turn decent concerned people who discover abject merciless cruelty being perpetrated on animals charged as criminals, & the criminals who are breaking the law & committing the cruelty let off absolutely free. This is a Bill that subverts the long established laws of Australia by forcing people who work in the industry to remain silent & condone criminal actions or face prosecution.

This Bill is designed to charge decent people as criminals who will not tolerate animal cruelty & uphold their democratic rights to maintain their moral integrity & Australian principles by not remaining silent & reporting to the proper authorities & police the law breaking actions by anyone or organisation who cause abject cruelty to animals. Major exposés depicting systemic cruelty to animals could not have occurred without the work of brave activists & whistle blowers who obtain undercover footage. Without them, the public would not have heard about the cruelty in the greyhound racing industry, at Wally's Piggery, Ingham's turkey slaughterhouse, Hawkesbury Valley meats, Rivalea pig slaughterhouse, or in the massive devastatingly cruel live export trade which has been covered up & lied about for years. Laws already exist around trespass, harassment and damage to property but the intention of this Bill is clearly to protect animal industries from public criticism and to hide issues of animal cruelty from the public. People who love & care for animals, believe in mercy to animals, & hate animal cruelty, who risk their own safety by rescuing animals & exposing law breaking criminals abusing animals, should be credited as heroes, not terrorists. Without them, the cruelty would likely still be occurring. The Bill is about profits & money making at the cost of enormous suffering. In August 2015, Niall Blair MP and Federal Agriculture Minister, Senator Barnaby Joyce announced that they too planned to use the NSW Biosecurity Bill 2015 to target animal rights activists who record operations of intensive farming facilities and disperse the information to the public. The Australian Parliaments seem bereft of moral fibre. The statements made reveal that the proposed Bill has the potential to be used as US-style 'ag-gag legislation' – laws that seek to gag animal activists, employees, whistle-blowers and the media from making public evidence of animal cruelty. These laws stifle transparency. There is already legislation that covers matters of trespass and recording of information, and as such the 2015 Biosecurity Bill is effectively a provision expressly aimed at silencing animal rights advocates and activists. Liberal Senator Chris Back has tabled a Bill attempting to pass federal ag-gag legislation. The oddly named Criminal Code Amendment (Animal Protection) Bill 2015 (Bill) has nothing to do with animal protection - instead, it protects those involved in animal abuse by ensuring evidence of systemic cruelty do not reach the public. This dangerous new Bill punishes activists and whistle-blowers, rather than increasing punishments to those that abuse animals. The Bill requires activists to hand over footage within 1 working day, essentially halting the ability to obtain evidence that will expose systemic abuse in the industry and will allow the industries to use the same old excuse of "rogue operator". It incorporates an emphasis on quick reporting of any documentation or footage obtained from factory farms - one of the hallmarks of US-style ag-gag legislation. The Bill also reverses the onus of proof – this means those that are being charged for recording animal cruelty must prove themselves innocent- rather than being innocent until proven guilty. This could cause innocent individuals to have to deal with harassing claims. In September 2015 the NSW government signed into law the Biosecurity Bill 2015. The Biosecurity Bill legislation has been criticised and labelled as the advent of Australian "ag-gag" legislation due to the powers and provisions it provides law enforcement with, particularly regarding activist activities on behalf of mistreated and abused animals. The integrity & standards of the Australian National Parliament is becoming a national disgrace by trying to deceive the general public with even the definition of this Bill by the laws it is trying to enforce onto the unsuspecting Australian public in the pursuit of protecting criminals who break the animal cruelty laws, & behaving like an ungodly regime forcing control to cover up criminal cruelty with laws by deceitful, coercive measures. This atrocious live export trade must be banned. Australia already has a trade in boxed, chilled meat which could be expanded to create thousands of rural jobs, animals would be slaughtered more humanely than the frightening, horrific, inhumane, killing that happens overseas such as breaking the legs of animals & stabbing out their eyes. Most of the information in this article is taken from Animal Liberation Australia & abridged with sources published in the public domain. Article by P J Hayllar on 18-4-2018 Copies of this posted to Federal Parliamentarians. Long established Animal Liberation Australia does tremendous work in helping in the plight of abused animals. They Investigate –Educate – Liberate. www.animal-lib.org.au & need your Valued Donations to continue their work.

Perish Mankind !

I am of the opinion that not one of those experiments on animals was justified or necessary - -

I witnessed many harsh sights, but I think the saddest was when the dogs were brought up from the cellar to the laboratory.

Instead of being pleased with the change from darkness to light, they seemed seized with horror & fear as soon as they smelt the air of the place apparently divining their cruel approaching fate - -

Hundreds of times I have seen a dog when writhed in pain, receive a slap, & an angry order to be quiet & behave itself.

To this recital I need hardly add that, having drunk the cup to the dregs,

I cry off, & am prepared to see not only science,

but even mankind perish; rather than have such a recourse,

to such horrific means of saving it. Dr. George Hoggan

(Assistant to vivisector Claude Bernard)

The spiritual malady that rages in the soul of the vivisector is in itself sufficient to render him incapable of acquiring the highest & best knowledge. He finds it easier to propagate & multiply diseases than to discover the secret of health. Seeking for the germs of life, he invents only new methods of death.

Dr. Anna Kingsford. Britain's first woman doctor.

Personal letter given to me for this book by a humble man with a troubled mind, with experience in several countries.

Quote: "From my learning I would like to relate that the metabolism & biology of all species are entirely different to each other, introduced diseases into animals all react differently & are entirely artificial to the original natural occurring diseases as in humans. I must conclude after 150 years of experimentations of negative failures it proves beyond doubt that extrapolation of data from animals to humans is impossible. I believe this is why many of the bizarre experiments in laboratories are now so profoundly cruel because every possible experimental model has been tried out on animals so vivisectors now resort to ill-conceived ideas of the most horrible unimaginable cruelty. I believe that not only are the public kept in the dark about this horror but the totally uselessness of governments & their departments such as Ethics Committees are blindly inept & condoning. Inspectors, regulations, codes of practice, approved procedures, I certainly know it's all unmitigated incompetence that vivisectors know how to manipulate; government control is a massive sham. If you could have unannounced access to inside some laboratories I have seen, you may witness scenes of abject horror.

Mentally disturbing atrocious evil I cannot describe. Cruel, horrendous, outrageous, frightful, unnecessary, invalid experiments driven solely by money, cruelty to animals that goes unseen or unheard about, & knowingly concealed.

People were never tortured in death camps to the degree or extent as comparable to the experiments that are inflicted on innocent animals in this day & age, the suffering is disturbingly distressing unspeakable cruelty, all evidence is incinerated.

The cliché used to palliate & exculpate the indefensible acts of heinous experimentation torture on animals of "there may be some discomfort" Is a huge terrible lie proffered by men in superior authorities of mercenary driven callous unconscionable mercilessness. Ordinary people purchase animal tested products

perpetuating heinous abject cruelty, people vainglorious in triumphantly donating funds to invalid animal cancer research experimentations believing they are do-gooders for personal fame waving their banners of egotism. People with self-image, ignorance, & self-importance, not wanting to know & never checking how their donations are wasted on cruel animal torture. Ordinary people collecting & funding for some cancer research are the main basic finance of immense fraudulent experiments & grotesque animal suffering. People never check what their donations are being used for? Impressed by official words like, 'Medical Institute' 'Nat; Research' 'Council' 'Cancer' 'Scientific' often conceals outrageous cruelty to animals I was qualified with a career, but I would rather be destitute & love animals" Michael H. 1:10:2013

The Privilege Of Having My Little Dog

*The love exuded by my little dog is far too great to measure,
She is a gentle little character that I shall ever treasure.
So soft & warm & loveable & always at my side,
I would wish forever & ever, together we always could abide.*

*She has her funny little quirks & cheeky doggy little ways,
And loves to snore upon the grass on warm & sunny days.
Although asleep, content, & happy no matter where she be,
Alert she is to anything because she's looking after me.*

*With eyes so big so deep & dark, like pools of liquid onyx,
She brightens up the darkest day like effervescent tonic.
Always aware just how I'm feeling especially if I'm sick,
With caring loving cuddles combined with her doggy lick.*

*My little dog is a magnificent miracle just on loan to me,
She is the greatest pleasure to have to that you must agree.
A little free & loving spirit, a totally free wonderful entity,
A trusting, loyal, dog of fun, smart, obedient, such felicity.*

*Such delight & glee & happiness is written on her face,
When out for walks she spies a magpie & naughtily will chase.
When evening comes it's tea time & the end of day is nigh,
It's time to sit upon my lap to settle happily with a contented sigh.*

P J Hayllar.

Where is the Outrage, Prevention of Cruelty to Animals & Condemnation Against the Unnecessary Invalid Vivisection Torture of Laboratory Animals?

Why is the unnecessary & inhumane torture of laboratory animals still allowed? It's About, Secrecy, Acquiescence, Iniquity, Evil, Above All Failure To Stop The Worst Cruelty To Animals In History.

Do Animal Ethics Committees (AEC's) collaborate with vested interests on the whole iniquitous business? Are government bureaucracies feigning important titles (like tinsel) supposedly in charge but complicit to compromise & partisanship to interests not in the national interests to whom they are responsible? Or in the interests of the general public's opinions or their health? Bureaucratic systems without humanitarian integrity & ignorance in ethical valuation? No proper control but only concerned at sustaining the status quo of invalid pseudo science experimentations of horror? Are (AEC's) biased, manipulating preferential treatment to vested interests? Worse still where is the **loud voice of outrage** of any entity relied upon to stop cruelty to animals? **Is a domestic dog any different to a laboratory dog?** Torturing a dog, kitten, puppy, or monkey, that's well documented in the annals of vivisection laboratories, repeating same atrocious procedures over & over again. Is there any animal protection organization vigorously fighting for the rights of laboratory animals? Where is the Outcry? Shouting, Publishing, & Campaigning Against the Cruelty? This is exactly what hundreds of millions of donations should be used for but are reportedly used for other purposes & many millions invested instead. Is there acquiescence conceding to out dated laws for virtually non-intervention? Fox terrier 'Bindy' belonged to & was loved by an elderly lady' named Mary. Bindy was stolen & months later went to a city pound & from there to a cancer research facility. From a safe loving home to cages, trauma, inhumane treatment & finally cruelly experimented on. When Mary died she bequeathed 50% of her home & all she had to a society, which claims to help stop cruelty to animals, & 50% to a major cancer fund believing she was doing the right thing. The irony is that one of the beneficiaries does not help little dogs like hers because it was then a laboratory dog, & the other beneficiary funds grants to university & vivisection facilities who tortured her loving dog to death. Mary like the general public had no knowledge of this. It's a big dark secret. This is a true story not a scenario. **Can any one explain the ethical, moral, or physical difference between a domestic & a laboratory dog?** Hundreds of millions donated should be used urgently to inform people with saturation abolition campaigns to (**Stop Vivisection On All Animals No Differentiation**). Is there a resounding voice to oppose animal experimentations? How many of the general public know about it? Or have heard of it? **Where is the 'Outcry'** of the upmost priority, shouldn't torturing animals in the millions take president & urgency to stop? Having a policy is like a theory, having an axiom to postulate or a commission of words does not stop the cruel torture. Mary like most of the public did not understand the massive extent & scale of this covert heinous cruel horror. **People do not understand the situation! Because the general public are purposely kept in the dark !** Some peoples reactions are of total disbelief, rejection of information claiming and arguing that it must be wrong, incorrect & **could not possibly be happening**, as in England, Australia, America, & Europe, **it would never be allowed to happen** by organizations claiming to prevent cruelty to animals. Their first reaction to this information! **Is it also yours?** Why isn't everyone being told about it as a matter of urgent priority already? The public are unaware of the full details of the animal cruelty or the number of animals used per year that is institutionalised & government sanctioned? Australia & NZ 6-7 million? UK over 5 million? Unconfirmed. The animal research industry is a massive billions of dollars business, the people working in it become very wealthy, & any criticism is seen as a threat to the jobs of many people who base their whole careers on this demonic evil cruelty. Some universities gain grants to maintain their costs; men with impressive titles can gain kudos' & a new sham thesis for fame & honour. Puppy farms, monkey (primate) breeding facilities, degrees for vivisectors on huge salaries, companies that make equipment like restrainers & torture devices, & thousands of associated people, generate a massive industry along with the pharmaceutical & chemical companies. **There is No Protection from the Pain & Suffering for Laboratory Animals Actively Pursued & Loudly Advocated in the Public Domain; No animal cruelty protection organization with an Abolition Campaign of Outrage, otherwise it would probably Not Now Be Happening. This is mass cruelty & torture of millions of animals for pseudo science; people want it stopped as soon as they learn about it.** There is huge opposition to animal research by the majority of public worldwide vigorously opposed to animal research of any kind, **when it is fully explained to them.** Most people are not aware of the extent of the suffering, & that it is not necessary for ethical advanced medical science. All ask the same question, why isn't there prevention by any organization vigorously intervening & stopping it with a worldwide campaign? **It's a big grotesque secret because there are laws to stop the information getting known to the public.**

Statements in this article are my own personal opinion & conclusion based on evidence in the public domain.

A Critical Look At Animal Experimentation

Medical Research Modernization Committee

Christopher Anderegg, M.D., Ph.D. Murray J. Chen, MD. Stephen R. Kaufman.M.D.

Rhonda Ruttenburg, M.D. Alix Fano, M.A. Sixth edition, 2002.

These are Edited Excerpts for the Purpose Of This Book.

To Promote This Committee of Immense Professional Integrity, & Their Wealth of Knowledge

Why Vivisection Persists If animal experimentation is so flawed, why does it persist ?

There are several likely explanations. Vivisection is easily published. In the “publish or perish” world of academic science, it requires little originality or insight to take an already well defined animal model, change a variable or species being used, & obtain “new” & “interesting” findings within a short period of time. In contrast, clinical research, while directly applicable to humans, is often more difficult & time consuming. Also the many species available & the nearly infinite possible manipulations offers researchers the opportunity to “prove” almost any theory that serves their economic, professional, or political needs. For example researchers have “proven” in animals that cigarettes both do & do not cause cancer- - depending on the funding source.

Vivisection is self-perpetuating. Scientist’s salaries & professional status are often tied to grants, & a critical element of success in grant applications is proof of prior experience & expertise.

Researchers trained in animal research techniques find it difficult or inconvenient to adopt new methods, such as tissue cultures. Vivisection appears easier than clinical research. Researchers often assert that laboratory experiments are “controlled”, because they can change one variable at a time.

The control however, is illusory - -& undermine extrapolation of findings to humans.

Vivisection is lucrative. Its traditionally respected place in modern medicine results in secure financial support, which is often an integral component of a universities budget.

Many medical centres receive tens of millions of dollars annually in direct grants for animal research, & tens of millions more for overhead costs that are supposedly related to that research.

Since these medical centres depend on this overhead for much of their administrative costs, construction, building, & maintenance, they perpetuate vivisection by praising it in the media & to legislators.

Vivisection’s morality is rarely questioned by researchers, who generally choose to dogmatically defend the practice rather than confront the obvious moral issues it raises.

Animal researchers language betrays their efforts to avoid morality. For example, they “sacrifice” animals rather than kill them, & they may note animal “distress” but never acknowledge pain or other suffering. Young scientists quickly learn to adopt such a mindset from their superiors, as sociologist Arnold Arluke explains: “One message - - almost a warning - - that newcomers got was that it was controversial or risky to admit to having ethical concerns, because to do so was tantamount to admitting that there was some thing morally wrong with animal experimentation, thereby giving ‘ammunition to the enemy’.

Conclusion, The value of animal experimentation has been grossly exaggerated by those with vested economic interests in its preservation. Because animal experimentation focuses on artificially created pathology, involves confounding variables, & is undermined by differences in human & nonhuman anatomy, physiology, & pathology, it is an inherently unsound method to investigate human disease processes, The billions of dollars invested annually in animal research would be put to much more efficient, effective, & humane use if redirected to clinical & epidemiological research & public health programs.

Medical Research Modernization Committee.

The MRMC is a non-profit health advocacy organization composed of scientists & medical professionals who identify & promote efficient, reliable, & cost-effective research methods.

The MRMC focuses exclusively on the scientific merits of different research approaches, even though some undoubtedly raise serious & important ethical concerns, MRMC- sponsored activities include research, publishing, & student education. Dues & contributions are tax deductible.

For only a small annual fee that entitles members to the quarterly MRMC report & other interesting & very informative publications as they become available. For further information, contact the

MRMC [www. stkaufman@mindspring.com](http://www.stkaufman@mindspring.com) www.mrmcmed.org.

Their Life Is As Precious To Them As Our Life Is As Precious To Us

*People For National Health
The British Antivivisection Association*

Quote: "This is a voluntary, unpaid organisation which exists to expose the fraudulent practice of animal experimentations: concentrating on the medical, scientific, environmental & economic aspects of the argument. All efforts, by the genuine anti-vivisection movement, to elicit peer-reviewed, evidence-based research, from the vivisection industry & its supporters, showing the scientific validity of animal experimentation, have failed.

As it is becoming ever more widely known that animal experimentation results in colossal amounts of death & damage to humans as well as animals- laboratory or otherwise- & is a threat to the planets ecosystem, vivisection is becoming increasingly difficult to defend.

That is why the industry & its on-the-payroll political & media agents prefer the human rights versus animal rights argument.

If the public genuinely believe that children have cancer due to bad luck & that torturing rats & dogs will find a drug to cure cancer- a totally impossible concept- it is quite understandable why animal rights arguments hold no water with the public.

Hundreds of thousands of combinations of petro-synthetics are in the Earth environment- the air, the waters, the land, the foods, the humans, birds, animals, & fish-- : all without any valid safety & efficiency testing.

By choosing the right species of animal, bird, fish--, the right dosage, the right mode of ingestion- Virtually anything can be passed onto the market: Death cup mushrooms, deadly nightshade, hemlock, strychnine, scopolamine, prussic acid, thalidomide, clioquinol, vioxx, opren, cigarettes— all safe. Conversely: lemons, comfrey, parsley, moderate amounts of sunshine, - can all be shown to be dangerous or deadly.

The cancer plague spirals further out of control: thanks to vivisection. As Nobel Laureate, Dr Otto Warburg demonstrated, cancer is, fundamentally, an anaerobic condition.

Oxygen is increasingly being forced out of the cell by pollution: the pollutants are "animal safety tested".

The failure of research into cancer, arthritis, diabetes, heart disease, etc; etc; after countless billions of pounds/dollars/yen wasted; & the creation of tens of thousands of new diseases are due to animal experimentations. "Animal research" guarantees failure & the ever- lasting need for more funds.

The multi-trillion dollar empire of petrochemicals, vivisectors, animal breeders & suppliers, torture equipment manufacturers & sellers, the on-the-take medical, political & media agents, & the rest, constitute a very powerful obstacle to change" Unquote.

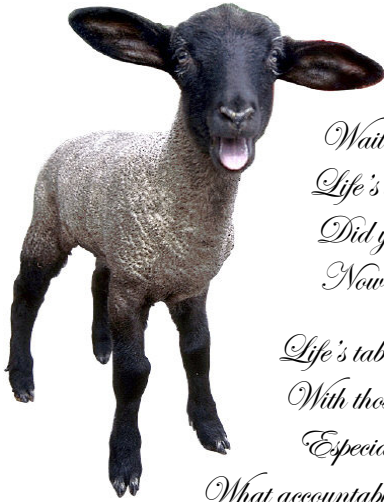

Our first task is to publicity: please spread the word.

Life's 'Al La Carte' Menu

*Years quickly passing of your 'Carte blanche' of life,
Temporal clock to stop, the finale cut of payoff knife.
Now the angry waitress of destiny is drawing very close,
Serving your destined tray of fate you may well suppose.*

*As the years have quickly gone by mortality looms near,
Inevitably to chime the hour & end! But what's to fear?*

*You're going back some where from whence you came,
What is it you will take with you, some fame or shame?*

*Waitress, waiting with your account, a debt & price to pay,
Life's spark almost gone, now it's on to judgement day.
Did you greedily consume all on the vast menu of life?
Now time to clean the dishes marked & left with strife.*

*Life's table had a setting & with it should you of shared,
With those many who starved & needed help & badly fared?
Especially helpless animals who felt pain the same as you,
What accountability to suffering animals did you accrue?*

*The slaughterhouse was far away but complicit you were,
Killing for your satisfaction but your conscience didn't stir.
Animal meat is all considered normal in the world of man,
Maltreatment of the animals started when humans began.*

*Back to nothing you will go as your life's table is cleared,
Realisation of a fundamental error towards animals feared?
Culinary delights in life of blameable things you found nice,
Culpable towards animals but too late to now think twice?*

*You are here for just split seconds in the vastness of space,
Your footprint upon this Earth what will it show or trace?
Inhumanely, a calf's blood was poured out upon the ground,
Wanton heartlessness, & cruelty, but was mercy in you found?*

*All for what? All this callousness, you accepted & did show,
Animal abuse & with the lemmings of mankind you did go,
In eons of time to come your life will be recorded with a stain,
To warm blooded animals you dealt out endless misery & pain.*

By P J Hayllar.

Thinking With A Humanitarian Conscience

*To a man whose mind is free there is something
even more intolerable in the sufferings of
animals than in the sufferings of man.*

*For with the latter it is at least
admitted that suffering is evil
& that the man who causes
it is a criminal.*

*But thousands of animals are uselessly
butchered every day without a
shadow of remorse.*

*If any man were to refer to it,
he would be thought ridiculous.*

And that is the unpardonable crime.

It cries vengeance upon all the human race.

Romain Rolland (1866 - 1944)

Vivisection Is Wanton, Needless, Barbaric, Cruelty.

Most experiments on animals are not worth doing, and the data obtained not worth publishing

Professor H. F. Harlow, University of Wisconsin –

Animal experiments are a waste of time and money and a cause of suffering.

Dr. W. Graham Richard, Fellow, Tutor and Lecturer in Physical Chemistry,

Oxford University, holder of Lord Dowding Fund for Humane Research Award

Some costs are so high they should not be incurred no matter what the value that is obtained by the expenditure.

In plain terms some experiments are so repugnant that even if the information to be garnered from them were of great value, nevertheless, the experiments should not be carried out.

Dr. G. E. Paget, The Ethics of Vivisection, 1974 –

Professor C Lovatt Evans was reported to have told the British Association at Glasgow that “no doctor can use a stethoscope, feel a pulse, take blood pressure, administer a hypodermic, give an anaesthetic or a transfusion, perform any modern operations or indeed take any steps in diagnosis, prognosis, or treatment without utilising at every turn knowledge derived from results of animal experimentations & obtainable in no other way”.

This is a statement fairly typical of the almost incredible nonsense which pro-vivisectionists have the temerity to “broadcast” in their public utterances & writings. It seems almost an insult to the readers intelligence to assume that it requires no answer. However, let us take the claims in order: (Edited version as follows),

1 – *The Stethoscope*: invented by *Laennec* using a roll of paper on a patient, clinically developed human trial.

2 – *Radial Pulse*: *Hua Tu*, China 2,000 yrs ago discovered to high degree of accuracy diagnosis of radial pulse on humans nothing to do with animals. 3 – *Anaesthetics* *Hua Tu* also pioneered anaesthetic drugs & removed diseased lengths of bowel, suturing with out infections on human trials & no animals were ever used.

4 – *Blood Pressure*: Cruel & futile animal experiments were performed for years proving inapplicable to humans. They contributed nothing but endless futile years of cruelty in animal experiments, & nothing to the invention of the apparatus now used to record it, which was gained through the study of the laws of hydrodynamics.

5 – *Hypodermic Syringe*: Invented by *Charles C Pravaz*, Used by *Alexander Wood* in *Edinburgh* & was perfected for efficacy upon human volunteers. 6 – *Plus*: Respiratory anaesthetics, chloroform, anaesthesia, basal anaesthetics, blood transfusions, discovered & perfected by clinical human trials only, nothing to do with animals.

7 – *Surgical Skills*: Fantastic Myth of Out Right Lies; Summed up by *Dr A Desjardins*, president Society of Surgeons, “I have never known a single good operator who has learned anything from experiments on animals”

-www.MedicineKillsMillions.com

“There are many known differences between chimps & humans. Certainly there are enough differences to make the use of chimps for medical experiments as if they were human nonsensical.

*No chimps- have been of any use in the experiments they were used for –
The whole wretched business (& it is big business) should be stopped now.”*

*Professor Vernon Reynolds, primatologist & Professor of biological anthropology,
University of Oxford. (Letter 29/02/1996, & foreword in- The Wrong Path, 1996).*

Most of the funding to torture animals comes from the general public. Unaware that their donations to some cancer research is being used to support this money driven live animal research condemned by many as fraudulent. Some Cancer Organizations describe this as ‘Grants to external researchers’ check what your donations are funding.

Animals The

Exemplars

1- There must be an answer? Somewhere to relate,
Why mankind's path is doomed to an inevitable fate.
The writings on the wall of his prognostication,
With evidence unless you're blind of his annihilation.

2- Living harmoniously with animals is not his call,
Deterioration is bemoaning man's inevitable fall.
To conserving all animal habitats man has opposed,
Destruction, greed & desecration is the path he chose.

3- The atmosphere is changing with obvious manifestations,
Man rides to disaster, & gallops to a catastrophic destination.
The animals are a sign of conservation for life's continuance;
But avarice, merciless, monetary gain, is man's chosen stance.

4- The wild kingdom has a place & should be left alone,
Left in peace wild animals should be free to roam.
They are guardians of the forests & jungles far & wide,
They are no threat to man in the arboreal places they hide.

5- The animal's habitats all over in each & every place,
Equate to life-giving oxygen produced for the human race.
Concrete, factories, & cities producing poisonous situations,
Benign to survival against life's fundamental foundations.

6- Animals are an evident example to mankind to survive,
They live assisting & keeping all things regenerating & alive.
If man had cared for animals properly & tended love deserved,
Animals are precious & point a moral lesson if observed.

7- The earth shared properly with animals importantly in mind,
Would have meant a safe sustained existence for all mankind.
Animals do not discriminate, hate, wage wars, or life defy,
They actually show man how to live & on nature to rely.

8- Mankind cannot see it! That's 'The wood for the trees'.
Development & progress uncaring will bring him to his knees.
Mankind the most intelligent species? That can't be right?
Animals are perfect exemplars, true custodians of earth's delights.

By P.J. Hayllar

People for National Health

“The sixty-year legacy of modern medicine. In 1948, a group of well meaning but seriously misinformed individuals founded the British National Health Service in the belief that the public’s easy access to the rapidly emerging Wonders of Modern Medicine would lead to a healthy nation & reduce NHS spending. In 1950, the NHS cost around 350 million pounds: the monetary-inflationary equivalent of this, today, is less than 9 billion pounds. In 2008, the national disease money pit swallow up in excess of 100 billion pounds. The nation’s health is the worst it has been for sixty years, having deteriorated constantly & remorselessly since day one. In 2002, 1 in every 16 babies born in mid Devon had at least one defect compared with less than 1 in 630 babies born in Islington. Why? Because Islington is not choked with pesticides & herbicides which have not been scientifically evaluated for safety. Still-births & first week deaths have risen to over 5,300 per year. 50,000 premature babies are born, annually” [End of quote.](#)

[\(Virtually all-animal tested poisons do not pass scientifically tested evaluation. Too poisonous to humans\).](#)

[Quote:](#) “Over 1 billion prescriptions are now given out per year: with 22 million people on repeat prescriptions. Pharmaceuticals are at killer- number 3 or 4 position on both sides of the Atlantic.

We have tens of thousands of new diseases, 40% - & rising – of the population have or will develop cancer.

As there is nothing wrong with the concept of a nationalised health facility, this leaves the practice:

Modern Medicine: antipathic medicine; allopathic medicine; the medicine of symptom suppression & removal with the petro-synthetic drug, radiation & the knife; the medicine of the opposites; of antidepressives, antihypertensives, antipyretics, anticoagulants, antivirals: the medicine of the War on Disease; using the human body as a passive battlefield, trashed in the process: the medicine of the bug-hunters & their Germ Theory & multi-billion-dollar empire of vaccines, antibiotics, antiseptics, antibacterials & disinfectants: all with catastrophic consequences for human health & immunity & the environment.

Consensus Medicine to avoid litigation: Medicine by the book, whether or not the treatment is useless or worse than useless: whatever the cost or consequences to the tax -payer or the patient: the medicine of safety & efficiency tests on rodents, dogs, cats, goats, fish-whatever” [End of quote.](#) [\(With catastrophic results in the costs of human injuries & deaths, & the merciless cruel suffering of invalid useless animal experiments\)](#)

[Quote:](#) Modern Medicine would not survive in a court of science if it were ever so foolish as to enter such a place but it is not required to do so. Apart from its political friends, a small army of painfully-transparent on-the-payroll media plants, trying to pass themselves off as “science editors” “medical correspondents” “health writers” provide a regular supply of “medical breakthroughs” & regular attacks on what they call “alternative medicine.” The Dept, of Health promotes, allows, fails to condemn virtually every health-destructive aspect of modern living: saturated fats, refined carbohydrates, pesticides, herbicides, vaccines, X-ray screening, mobile phones, microwave ovens, fluoride, aerosol air-fresheners, colorants, preservatives, aspartame, MSG,. Treatments, which should only be used as a last resort, when life-enhancing therapies have failed, are routinely the first choice. This government wants more screening, more vaccination, more water fluoridation:

Gordon Brown said we need “new drugs & technologies”: [putting out the fire with petrol. A health service, nationalised or otherwise, cannot be run on the basis of junk food, animal experiments, pharmaceuticals, radiation, invasive tests & conveyor-belt surgery. This would result in completely out-of-control expenditure & would create untold amounts of chronic, degenerative &, above all, iatrogenic disease: a medically-introduced plague; which is precisely what we have now”](#) [End of Quote.](#) Following excerpt by P J Hayllar

The Australian National Health Policy costs the government 2011- 2012: \$140.2 Billions according to the Australian Institute of Health & Welfare- Expenditure. Compared with the UK relative to the population of Australia the comparison is a disaster. The Australian Drug Evaluation Committee [RELIES](#) on safety & efficacy on data from other countries where substantial fraud is evident & documented as in Japan. Australia has approved drugs that are banned in the US & even China! Its mind boggling that its bad enough that the extrapolation from animal experiments is impossible & results in serious injury & deaths from false data, but no evaluation just fabrication being accepted in some instances by accepting evaluation from other countries. The “Bureaucratic Unreasoning” by people who with self importance are obstinate to commonsense, alarmed at anything they cannot control, to be viewed as a threat to their jobs, prestige, [INCOME](#), or a criticism of them, (which in many cases is true) impedes advancement & sensible improvements based on proper ethical scientific knowledge for the National Health Wellbeing & Safety of the people they are responsible to protect. These failing systems have an underlying problem of [MONETARY](#) driven animal experiments resulting in sickness to humans at huge costs, cruel suffering to millions of animals, & death to both.

I would encourage all readers to take the time to view the ALF website to gain an insight into many varied & very important aspects, exposes, & complex factual incidences & issues involving the ALF & the animal rights movement.

Quote "Being an activist is a heart breaking job. Your friends make fun of you & your family may shun you. Sometimes you may even lose your spouse. You spend money you don't have & never make a dime. You fight constant propaganda teaching people that don't care. You can lose your job, money, sanity, & even your life.

You are often hated & almost never appreciated. Sometimes all your efforts feel like a waste of time.

But if it's your calling none of these things will stop you. Because people like you change the world.

The ALF's short-term aim is to save as many animals as possible & directly disrupt the practice of animal abuse. Their long term aim is to end all animal suffering by forcing animal abuse companies out of business.

It is a nonviolent campaign, activists taking all precautions not to harm any animals (human or otherwise) Because ALF actions may be against the law, activists work anonymously, either in small groups or individually, & do not have any centralized organization or coordination. They reveal the horrors & atrocities committed against animals behind locked doors, by performing non-violent direct actions & liberations.

They liberate animals from places of abuse, i.e. laboratories, factory farms, fur farms, etc., & place them in good homes where they can live out their natural lives, free from suffering.

They inflict economic damage to those who profit from the misery & exploitation of animals.

The Animal Liberation Front consists of small autonomous groups of people all over the world who carry out direct action according to ALF guidelines. Any group of people who are vegetarians or vegans & who carry out actions according to ALF guidelines have a right to regard themselves as part of the ALF." Unquote

Photo from ALF website of a shaved monkey having had its eye lids sewn together. Secretly obtained from an animal experimental laboratory by animal rights activists. This unmitigated atrocious tortuous cruelty of pseudo-science was probably as usual done by a person of no medical qualifications or degrees & without administering an anaesthetic. Some of the greatest & renowned institutions (example p 47) have been exposed for allowing abject

cruelty & fined, but only because brave animal rights activists have courageously obtained the photos. Spineless, ignorant, politicians strut around listening to lobbyists who are paid enormous sums of money by vested interests proffering the old cliché "animals are required for scientific research" Nothing can be further from the truth. The Pope, Royalty, Presidents, Prime Ministers in charge of the so-called Christian governments who make a mockery of the principles & words of the God of the Christian Bible that they with hypocrisy espouse. Where is the Truth, Righteousness, Love, Mercy, Compassion? These are Satanic ungodly works of immense uncivilised heinous cruelty perpetrated solely for money. Inept politicians are culpable & unconscionable for fear of being labelled sentimentalists, instead they are merciless cowards. There is no scientific reason or need to torture animals in this day & age but the greed of money & power assures its continuance, & the heinous, ungodly, cruelty goes on unabated. P J Hayllar.

Unascertained? & Unperceived?

*Did you fill out a requisition form just before you were born?
What was it that you asked for ? To be given or adorned.
Was it your 'God' ? Parents? Haphazard random? What's true?
Graciously, unsolicited, unessential, gratis, a chance at life for you.*

*And when you go upon your weary way back to whence you came,
This free life you were given will it have been all used without shame ?
For if you took for granted your quick blink of universal life expended,
To nothing but the dust return & nought for you will be transcended.*

*The logbook of your life is all recorded in the annals of existence,
It cannot be erased or changed as it happened with consistence.
As your consciousness remembers all the moments been & gone,
What did you achieve ? Is there're a good feeling that you shone?*

*This Earth that you appeared upon is free for all living things,
Suppose if you had been a little calf, lamb, pig, or a bird with wings:
And by humans you were controlled your fate on humans to rely,
Hung upside down in slaughterhouses so cruel & callously to die.*

*This shared Earth of beauty which you could endeavour to maintain,
You are actually responsible for helping extinction of animals slain.
So short your life! Yet leaving Earth a trail of destruction belies,
You could have been an asset to Earth & to the worldly ideals defy.*

*Still a chance to do some good make a stand before it is too late,
Please show mercy to the animals before entering mortality's gate?
Remember that pain is just the same for animals, who suffer silently,
Complicit? Responsible? Or do you for granted take life free?*

P.J Hayllar.

Anti-Vivisectionist Thinking Is Actually Scientific Truth

Quote: “Anti-vivisectionists ethics, principles, standards, purpose, & proven scientifically known indisputable established facts, confirms the basis of their claims for them to be scientifically correct”.

“Anti-vivisectionists reasoning’s based on the accumulated factual history of laboratory animal research, proves beyond any reasonable doubt that vivisectors conduct medieval pseudo science that is perpetuated purely & only for monetary gains, & has never had any proper scientific known value. There is actually no known basis to explain what they are doing as it really is torture & horrific cruelty of animals in an alchemy of valueless experimentations. If there was any validity in vivisection that has been perpetuated for decades where are the scientifically published & proven results?”

Unanimous Accurate Evidence Based Recorded History of Animal Experiments 150 Years Results

“Charity is Indivisible. If a man resents practical sympathy being bestowed on animals on the grounds that all ought to be reserved for the species to which he himself happens to belong, he must have the mind of a pinhead”. Brigid Brophy.

Psychological animal experimentations another grotesque form of pseudo scientific animal torture.

“Psychological animal experimentation is both unscientific & ethically bankrupt. What do we learn by separating infant macaques monkeys from their mothers? Does blinding a kitten teach us anything about human behaviour? There is no known human benefits from ablating the brains of cats, monkeys, squirrels or mice”. Wayne Johnson, Ph.D

Falsifying results in pseudo scientific animal torturing laboratory experiments.

“We wish to know when the medical profession will unite in expressing its dissatisfaction at the way they are being misled by the published results of experiments on animals in physiological & pharmacological laboratories?”

Editorial, Medical Times.

Isn't it self-indictment by vivisectors who cut the vocal cords of animals crying in pain to avoid hearing them.

“How do we know that we have a right to kill creatures that we are so little above, as dogs, for our curiosity or even for some use to us? Perhaps that voice or cry so nearly resembling the human, with which providence has endowed so many different animals, might purposely be given to them to move our pity, & prevent those cruelties we are too apt to inflict on our fellow creatures”. Alexander Pope (1688 – 1744)

Institutional Government Sanctioned Cruelty

“Institutional cruelty does everything it can to conceal the fact that it is destroying its victims, & in doing this it keeps spectators from feeling disgust & from being confused by the paradox of trying to justify the unjustifiable, of trying to praise the smashing of the weak” Phillip P. Hallie, Cruelty.

“Perhaps the time has come to formulate a moral code which would govern our relations with the great creatures of the sea as well as those on dry land. That this would come to pass is our dearest wish”. Jacques Cousteau

Dr. Catherine Roberts. The Scientific Conscience

“Man’s increasing awareness of humaneness indicates that he has reached a new threshold in his evolution & that therefore the problem of painful animal experimentations now concerns all mankind & not just a panel of experts.

To describe the screams of tortured animals as “high pitched vocalization” while impeccable from the standpoint of scientific writing, only adds weight to my argument- To inject more human feeling into the biologists mental outlook would give him a far saner perspective than he now possesses with which to evaluate the relative importance of his own activity. Why does any investigation which can be called “scientific” automatically convince both the scientist & the layman that it is intrinsically valuable for the promotion of human progress?”

Peter Black, Daily Mail, London.

“Unfortunately, the more horrible the act seems, the more likely newspapers are to spare their readers the shock of reading about it.

This of course, is a very useful weapon for the scientists concerned.”

John Cowper Powys

“The public in America has been kept in the dark, even more than the public in England, about this matter of Vivisection - The “sentimentality” in this matter is to be found, not in those who oppose this monstrous crime, but in the ridiculous awe with which the average person, hypnotized by these crafty scientists & their sycophantic press, regard the whole problem. What science is really suggesting is that it is a sign of superior intellect to be completely devoid of natural goodness, of natural pity, & of all natural sensitiveness.”

“Until we stop harming all other living beings, we are still savages.” Thomas Edison.

“The deeper minds of all ages have had pity for all animals”. Friedrich Nietzsche.

Help Stop the Horrific Skinning of Dogs

Letter of 5-03-2015, (that has been carefully edited by some graphic details omitted for suitable reading & space in this book) from Ingrid E Newkirk. Founder PeTA. People for the Ethical Treatment of Animals
“Dear Peter & Susan,

“A German shepherd was next. She looked just like a dog I loved long ago. She was dragged to the killing floor. Our eyes met briefly before a club came down on her head. Her throat was cut, & she was tossed onto a pile next to a dog who still appeared to be alive. Soon her skin was headed out the door to be sold”

That’s how a PeTA Asia investigator described the horrors at an abattoir in China where terrified dogs- some likely stolen from loving homes or snatched off streets- are beaten & killed before their skin is turned into gloves & other products & sold to unsuspecting consumers around the world.

Will you help us work to save dogs & other animals from hideous cruelty? Make an urgent donation today, PLEASE

Footage captured by the investigator reveals what’s behind the global skins trade that’s believed to be responsible for the death of millions of dogs, cats, & other animals in China each year. An employee told PeTA Asia’s investigator that this one operation bludgeons & skins as many as 200 Dogs a day, & he visited five other places to expose the hellish suffering that the largely unregulated international leather industry doesn’t want YOU & consumers to know about or see.

The skins of these abused animals are sold for an average of 15 yuan each or roughly \$3.00 – but clearly no price can be placed on the immense suffering these gentle animals endure before they’re killed. The dog skins are made into women’s dress gloves, men’s work gloves & other wearing apparel & exported by China & sold around the world.

The global skin trade is violent & cruel, but with your help by giving a donation, PeTA can do more to help stop it.

There’s no justification for making a dog - or any other animal – suffer for a pair of gloves or a small wallet.

But such cruelty extends well beyond the more than a billion animals the leather trade slaughters annually.

Every year, millions of other sensitive animals are also painfully killed or tormented – sentenced to become part of a fur-trimmed coat, a wool sweater or a down jacket. It’s an industry that’s so vile that not even the youngest of animals are spared – as seen in previous investigations revealed that

A coat made out of skins was of 42 German shepherd puppies”

Making a donation today or after reading this article & book will help strengthen PeTA’s vital work to save animals from cruel abuse & expose the hideous horrendous horror of the fur trade.

DOG LEATHER GLOVES

With your help, PeTA can strengthen their ground breaking work to educate consumers about the horrors of the skins trade & promote respect for animals. Since this investigation first captured headlines, over 10 million people around the globe have watched the investigations video footage & many thousands have pledged never to wear animal skins again. As so many consumers are learning for the first time how dogs are killed, skinned & turned into leather, we need to do more right now to help keep this tremendous work for animals going.

Join PeTA see the undercover investigation footage on their website & sign The Leather- Free Pledge. You can take action right now by writing letters & copying the information from this page & send it to newspapers, politicians, TV morning shows & current affairs, schools, & universities papers.

TAKE A STAND FOR THE HUMANITARIAN MERCIFUL SAKE OF ANIMALS

“I wanted to turn away but kept the camera going in the hope that consumers who see these images won’t turn away from the horror of the skins trade.”
– Statement from PETA Asia’s investigator

Help PETA's efforts to expose and stop the horrors of the international skins trade and do more for dogs and all other animals.

DONATE NOW!
